

App\Models\CategoryModel
\findDescendants

App\Models\CategoryModel
\getSubtreelds

App\Models\CategoryModel
\findSubCategories

```
graph LR; A["App\Models\CategoryModel<br>\findDescendants"] --> C["App\Models\CategoryModel<br>\findSubCategories"]; B["App\Models\CategoryModel<br>\getSubtreelds"] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, two white rectangular boxes represent source methods: '\findDescendants' and '\getSubtreelds', both within the 'App\Models\CategoryModel' namespace. Blue arrows point from each of these boxes to a single gray rectangular box on the right, which represents the target method '\findSubCategories' within the same namespace. This suggests that both '\findDescendants' and '\getSubtreelds' are implemented by or delegate to the '\findSubCategories' method.
