

App\Services\Product
\Cache\ProductCacheManager
\multiLevelGet

```
graph LR; A["App\Services\Product<br/>\Cache\ProductCacheManager<br/>\multiLevelGet"] --> B["App\Services\Product<br/>\Cache\ProductCacheManager<br/>\getEntity"]; A --> C["App\Services\Product<br/>\Cache\ProductCacheManager<br/>\getQuery"]
```

The diagram illustrates a multi-level get method delegating to two specific methods. A central box on the left, labeled 'App\Services\Product \Cache\ProductCacheManager \multiLevelGet', has two blue arrows pointing to two boxes on the right. The top box is labeled 'App\Services\Product \Cache\ProductCacheManager \getEntity' and the bottom box is labeled 'App\Services\Product \Cache\ProductCacheManager \getQuery'.
