

App\Services\AdminService
\createAdmin

App\Services\AdminService
\updateAdmin

App\Services\AdminService
\validateBusinessRules

```
graph LR; A["App\Services\AdminService  
\createAdmin"] --> C["App\Services\AdminService  
\validateBusinessRules"]; B["App\Services\AdminService  
\updateAdmin"] --> C;
```

The diagram illustrates a dependency or call flow. On the left, two white rectangular boxes represent service methods: '\createAdmin' and '\updateAdmin', both under the namespace 'App\Services\AdminService'. Blue arrows point from each of these boxes to a single gray rectangular box on the right, which represents the '\validateBusinessRules' method, also under the namespace 'App\Services\AdminService'. This indicates that both '\createAdmin' and '\updateAdmin' rely on or call '\validateBusinessRules'.
