

App\Services\Authorization
Service\bulkRevokeRoles

App\Services\Authorization
Service\revokeMultipleRolesFromAdmin

App\Services\Authorization
Service\revokeRoleFromAdmin

```
graph LR; A["App\Services\Authorization  
Service\bulkRevokeRoles"] --> C["App\Services\Authorization  
Service\revokeRoleFromAdmin"]; B["App\Services\Authorization  
Service\revokeMultipleRolesFromAdmin"] --> C;
```

The diagram illustrates a mapping from two source methods to a single target method. Two white boxes on the left represent the source methods: 'App\Services\Authorization Service\bulkRevokeRoles' (top) and 'App\Services\Authorization Service\revokeMultipleRolesFromAdmin' (bottom). Blue arrows point from each of these boxes to a single gray box on the right, which represents the target method: 'App\Services\Authorization Service\revokeRoleFromAdmin'.
