

App\Services\CategoryService
\createCategory

App\Services\CategoryService
\updateCategory

App\Services\CategoryService
\isSlugAvailable

```
graph LR; A["App\Services\CategoryService  
\createCategory"] --> C["App\Services\CategoryService  
\isSlugAvailable"]; B["App\Services\CategoryService  
\updateCategory"] --> C;
```

The diagram illustrates a dependency or relationship between three service methods. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'App\Services\CategoryService' followed by '\createCategory' on a new line. The bottom box contains 'App\Services\CategoryService' followed by '\updateCategory' on a new line. On the right, there is a single gray rectangular box containing 'App\Services\CategoryService' followed by '\isSlugAvailable' on a new line. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both '\createCategory' and '\updateCategory' methods depend on or utilize the '\isSlugAvailable' method.
